Excel: Formula and Functions

This webinar that introduces us to formula and functions in a video suitable for entry level users. Starting from zero we introduce what functions are an spend a lot of time explaining how Excel works and why it does some of the things it does. If you just have a little knowledge from tinkering with Excel but want a deeper understanding of how it works this is the video for you.

If you have spent a lot of time using Excel you might not get as much from this webinar, I would then suggest you take a look at the webinar on <u>Excel Tables</u> or this one for <u>Intermediate Users</u>.
