

3.1. Security Toolkit: Self-Assessment for Organizations

Self-Assessment for Organizations

Below is a self-assessment tool that can be used by any organization to help gauge the efficacy of their current security practices. We encourage anyone using this Toolkit to complete this self-assessment and use the questions to help drive your conversations between management and your tech team. The self-assessment is not comprehensive but seeks to prioritize security tools and practices that are of higher in priority for legal aid and within reach of most organizations. After the assessment be sure to return to the toolkit for information about some of the steps your organization can take to address issues that became apparent during the assessment.
