

3.2. Security Toolkit: Self-Assessment for Individual Users

Self-Assessment for Individual Users

How are you keeping your devices secure (mobile phones, tablets, USB, laptops, desktops)?

Below is a self-assessment tool that individuals may use to start to gauge how secure their personal tech practices are. We encourage this assessment for anyone working for your organization. We also encourage all users to regularly participate in cyber security trainings geared for end users. After the assessment, you will be given recommendations on how you can improve your security practices.
