

Kemps

[Kemp's Case Works](#)

Kemps Prime can run onsite or be offered as a cloud based service.

PRIME OFFICE 16

Prime Office uses Microsoft SQL server to store data and Microsoft Office Access as a source of forms, reports, queries and menus. It is the traditional Prime that you are used to, but with expanded features. If you ran Prime in the past, all your custom queries, reports, forms and code can be used with little or no modification. Prime 16 also uses more of the power of SQL Server.

Prime Office is installed on your premises and maintained by you. The optional web features, online intake, PBI portal and case status work with Prime Office. An online display of the web version of Prime is available. Prime Office can be set up to run over the web using remote desktop technology.

PRIME CLOUD runs on the web and is an outsourcing of case management. Prime Cloud combines the flexibility of Prime Office with a web based version. You can choose to use the standard Office version, the Web version or let different users use different versions. Prime Cloud is hosted in a high security, Tier 3 data center run by Venture Technologies. It is an outsourcing of your case management needs. Security, backup, access and 24/7 connection assistance is provided. Current options include the Client Online Intake, the PBI Lawyer Portal and the Client Case Status apps.
